Re: Administrative Order, Termination Report  
LCP Chemicals, Inc. Superfund Site (USEPA ID# NJD079303020)

Dear Mr. Gorin:

The following termination report is submitted on behalf of ISP Environmental Services Inc. (IES) in satisfaction of the Section XXVI.97 requirements of *Administrative Order on Consent for Remedial Investigation and Feasibility Study*, No. II CERCLA-02-99-2015 (hereinafter referred to as the Order) issued by USEPA and as executed by IES on May 13, 1999.

With the USEPA having issued the *Record of Decision* for the LCP site, and approved the final *Remedial Investigation Report*, final *Human Health Risk Assessment*, final *Baseline Ecological Risk Assessment*, and final *Feasibility Study Report*, the work required by the Order has been completed. Therefore, this report serves as the Termination Report required by Section XXVI.97 of the Order as it documents the USEPA's final approval of the work items required by the Order. Specific documentation regarding completion of the work required by the Order is presented below.

IES believes that it has paid all oversight costs to the USEPA and has satisfied this requirement in accordance with Section XX of the Order.

Satisfaction of the work required by the Order may be summarized as follows:

- The USEPA approved the final *Remedial Investigation Report* (RIR) in a letter from Carole Petersen of the USEPA to John Hoffman of Ashland, dated August 12, 2013.
- The USEPA approved the final *Human Health Risk Assessment* (HHRA) and the final *Baseline Ecological Risk Assessment* (BERA) in a letter from Carole Petersen of the USEPA to John Hoffman of Ashland, dated August 13, 2013.
- The approved versions of the final RIR, HHRA, and BERA were transmitted to the USEPA electronically via an electronic mail message from Scott MacMillin of Brown and Caldwell to Jon Gorin of the USEPA, dated August 19, 2013.
